

## ENERGY EFFICIENCY EDUCATION PROGRAM (SC)

### PURPOSE

The purpose of this program is to educate students about energy efficiency in homes and schools through energy efficiency curriculum, Duke Energy Carolinas' online home audit and on-site school audits.

### PROGRAM

- This program is available, at the company's option, to K-12 students enrolled in public and private schools who reside in households served by Duke Energy Carolinas.
- This program provides eligible students the ability to perform an on-line energy audit of their home, and the ability to assist in an energy assessment of their school. Each eligible student who completes a home energy audit will receive an energy efficiency measure for their home, not to exceed \$30.00 in value, such as a package of compact fluorescent light bulbs or an energy efficiency starter kit.
